Yuki Regina Nakamura

Independent Product Designer · B2B · Remote

São Paulo, Brazil · yuki.regina@gmail.com · yukiregina.com.br · linkedin.com/in/yukireginanakamura

SUMMARY

Product designer for complex B2B. I design the brief as much as the screen: I research, design and ship in code. 8+ years across commercial operations, credit, risk and fraud, and product catalogues. I started as a graphic designer in Tokyo and worked as an art director in São Paulo advertising before moving into product. Today I run Faro Studio, an independent practice for B2B businesses that sell by quote request, and I work as an AI trainer with micro1. Portuguese, English and Japanese.

EXPERIENCE

Founder & Product Designer · Faro Studio — Mar 2026 – Present

Remote · Independent practice

Diagnosis, design and build for B2B businesses that sell by quote request, from the first research to the shipped product and its measurement.

- ROI calculator for an industrial equipment company, end to end: audited their WordPress site, turned their brand guideline into a design system, designed in Figma and shipped in Next.js with Claude Code. Measured the funnel in GA4 and GTM; 15 of the first 27 visitors left on the first screen, so I cut the flow from 4 steps to 2.
- Product catalogue with quote request for an electrical materials distributor in Paraguay (bga.com.py): a landing page with a quote form first, then a full catalogue with a quote cart, product data template, SEO for every page, GA4, GTM and Search Console.
- Built the studio itself: brand, site, a multi-step diagnostic flow with voice input, and an AI pipeline that turns diagnostic answers and site analysis into discovery briefings.

AI Trainer · micro1 — Sep 2026 – Present

Remote · Contractor

- Annotate video and image data for AI model training, following project guidelines and quality standards.

Senior Product Designer · Grupo Boticário — Apr 2024 – Nov 2025

São Paulo, Brazil · Remote

B2B platforms across commercial operations, risk, credit and fraud prevention.

- Designed and shipped the missing Selling Story flow for the B2B product catalogue with no PM in place, ahead of the Q4 deadline. Catalog users doubled in the eight months after launch.
- Ran 30+ interviews and mapped 47 pain points across 12 systems in the in-store credit journey, then narrowed them to the few that mattered. The direction I proposed became the brief for the next cycle.
- Redesigned a risk and credit journey in partnership with engineering; together we cut loading time by 30%.
- Built and maintained a Figma component library (variables, auto-layout, tokens) used across multiple squads.

Product Designer · UOL — Dec 2022 – Apr 2024

São Paulo, Brazil · Hybrid

End-to-end redesign of UOL Host's B2B e-commerce platform: onboarding, checkout and core flows.

- Benchmarked a 23-step path to a working store against competitors' 6 to 16. The entry was owned by another team, so I redesigned what came after: setup on one page, onboarding from 5 steps to 3, mobile first.
- Across the redesign and trigger-based onboarding emails, stores completing setup grew ~16× in eight months and email click rate ~3×. Platform NPS turned positive after launch.
- Designed an AI chat assistant for registration with the innovation team, the first product to adopt it. The team reported first-attempt completion up 27%.

Lead UX Designer · MUSA — Aug 2020 – Jun 2022

São Paulo, Brazil · Hybrid

- Joined as the 11th hire. Designed the service journey used in the seed pitch, plus the flows and usability tests for the Transporter App MVP, shipped in 3 months by an external studio.
- A year later, evolved the journey into a service blueprint that a 40-person team used to set product priorities.
- Implemented the design system with the team.

UX Designer & Art Director · Agência People — Jul 2019 – Sep 2020
São Paulo, Brazil

- Took over design coordination for B3, Brazil's stock exchange, after recurring client complaints. The complaints stopped.
- Delivered 18 projects for XP Inc in six months.

Co-Founder & Design Lead · UseGifCard — Apr 2017 – Jun 2020
Remote

- Co-founded an e-commerce platform for animated digital products; built brand, UX/UI and product experience from zero.

Art Director · Ogilvy Brasil — Feb 2014 – Mar 2017
São Paulo, Brazil

- Art direction for Magazine Luiza's digital transformation campaigns across digital, point of sale and TV.

ADDITIONAL EXPERIENCE

Designer · Sindria (AI EdTech) · 2023 · Freelance. Brand identity and landing page for a funded AI study platform for Brazil's university entrance exam; designed and shipped the page on Wix on my own.

SKILLS

Research: Product discovery · UX research · usability testing · JTBD · service design
Design: Interaction design · information architecture · design systems · Figma (variables, tokens, auto-layout) · accessibility (WCAG 2.1 AA) · developer handoff
Build & measure: Claude Code · Figma MCP · Next.js · Netlify · Google Apps Script · GA4 · GTM · Search Console
AI: Claude · Cursor · Figma Make · NotebookLM · video and image annotation

EDUCATION & TRAINING

Bachelor of Graphic Design · Nippon Designer Gakuin, Tokyo · Outstanding Student
Technology in Internet Systems · Faculdade do Comércio, São Paulo · 2025
Information Architecture & Design · School of Visual Arts, New York
Intro to Vibe Coding · Writing Effective Product Specs · Human-Centered AI · Uxcel · 2026
AI First Designer School · ADPList · 2025
Systems Thinking Applied to Design · UX Change · 2025
